Thiago Bronzatti

With a decade of experience in Supply Chain Purchasing, I've honed my skills in supply chain management and procurement. Now, I'm transitioning to programming, driven by a passion for technology and problem-solving. My background equips me with a unique perspective on process optimization. I'm cultivating software development skills, combining my analytical mindset with coding proficiency. This career shift stems from my desire to explore new challenges and contribute to innovative tech projects. I am enthusiastic about merging my strong Supply Chain foundation with emerging programming expertise, poised to be a valuable asset on software development teams.

Thiago Bronzatti

Skills

As a Full Stack Developer, I have acquired a strong range of skills to create complete and functional web applications. My expertise includes:

Proficient in both Python and JavaScript, essential for development on both the front-end and back-end.

Frameworks: Competent in Django and Flask for building robust Python web applications, and React for interactive and dynamic user interfaces.

APIs: I develop and integrate APIs efficiently, enabling seamless communication between different parts of a system.

Databases: Experienced in SQL, crucial for data management in applications.

Front-End: Solid skills in HTML and CSS for creating appealing and responsive user interfaces.

These competencies enable me to develop full-scale web applications, from concept to implementation, providing solutions tailored to meet clients' and end-users' needs.

I am committed to continuously improving my skills and staying updated with the latest web development trends to deliver high-quality and innovative solutions.
